PROFESSIONAL SUMMARY

Flutter Developer with 2 years of experience building, deploying, and maintaining production Android and iOS applications — including 5+ apps shipped end-to-end and live on the Google Play Store with 10,000+ combined downloads. Skilled in Firebase, REST API architecture, and mobile monetization (Google AdMob, AdMob Mediation, Unity LevelPlay, Google Play Billing), with hands-on experience turning app usage data into revenue and retention improvements.

TECHNICAL SKILLS

- Languages: Dart, Java, Python
- Mobile Development: Flutter, Android SDK, State Management (GetX, Provider)
- Backend & Cloud: Firebase (Auth, Firestore, Realtime DB), REST API design & integration
- Tools & Platforms: Git, GitHub, Android Studio, VS Code, Postman, Play Console, Cloud Console
- Mobile Monetization & Ads: Google AdMob, AdMob Mediation, Unity Ads, Unity LevelPlay, Waterfall Ad Strategy, Banner/Interstitial/Rewarded/Native/App Open Ads, Google Play Billing, In-App Purchases & Subscriptions
- Analytics: Firebase Analytics, User Behavior Tracking, Revenue Performance Monitoring
- Concepts: Scalable Architecture, API Integration, Performance Optimization

WORK EXPERIENCE

Flutter Developer → Full Stack Application Developer

Mar 2025 – May 2026

Codewright Marketing Solutions Pvt Ltd

- Owned the full lifecycle — development through Play Store release — for 5+ Flutter applications, including feature builds, third-party SDK integration, testing, and post-launch maintenance.
- Integrated mobile monetization, in-app purchases, and subscription workflows via Google Play Console and Play Billing, directly supporting revenue generation across live apps.
- Designed scalable application architecture using GetX and Provider for state management, cutting rework on new feature builds.
- Improved application stability and performance through systematic debugging, profiling, and crash resolution.
- Integrated Firebase services, REST APIs, and analytics tooling to enable real-time data handling across products.

Flutter Developer Intern → Flutter Developer

Apr 2024 – Mar 2025

Wayug Infotech Solutions Pvt Ltd

- Built and maintained mobile applications in Flutter with REST API integration, progressing from intern to full developer within the year.
- Implemented Firebase Authentication and real-time database handling to support scalable, production-ready apps.
- Partnered with cross-functional design and product teams to improve UI/UX, lifting user retention by 20%.

Machine Learning Intern

Aug 2023 – Sep 2023

CodSoft

- Built ML models for spam detection, fraud detection, and churn prediction, achieving 90%+ accuracy.
- Optimized model performance, cutting processing time by 30%.

PROJECTS

Reflex Builder — 10,000+ downloads, live on Google Play Store

- Built a real-time, reaction-based mobile game in Flutter and Firebase, taken from concept to 10K+ organic downloads.
- Integrated AdMob and Unity LevelPlay mediation for monetization and implemented analytics to track engagement and retention.

Tap Until Regret — live on Google Play Store

- Built a precision-based mobile game with interactive UI and real-time feedback.
- Integrated Firebase backend, monetization SDKs, and analytics tracking end-to-end.

SIGN IT UP — ML-powered accessibility tool

- Developed an ML-powered solution to assist hearing-impaired communication, reaching ~85% recognition accuracy at under 200ms latency.

ACHIEVEMENTS

- Best WIE (Women In Engineering) Team — Vihaan 6.0, DTU Hackathon, organized by IEEE DTU.
- Top 15 Teams — Hack Unicorn Hackathon, organized by GDSC, GTBIT.
- Winner, Social Cause Track — Lean In Hacks 5.0, IGDTUW Hackathon, held at Microsoft Office, Noida.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning — Guru Tegh Bahadur Institute of Technology, GGSIPU

CGPA: 9.10

Delhi, India | 2021 – 2025

Central Board of Secondary Education — MR Vivekananda Model School

- Class 12th (2021): 86% | Class 10th (2019): 91%
